

HAIDER M. SHWKAT

Baghdad, Iraq | +964 771 896 4778 | haider.m.shwkat@outlook.com

Professional Summary

Results-driven Computer Science Specialist and Data Operations Consultant with extensive experience in workflow automation, large-scale database management (22K+ records), e-commerce catalog integrity, and network infrastructure. Proven track record of developing custom Python automation tools, deploying ERP systems, leading high-pressure event operations, and resolving complex technical bottlenecks for major enterprise clients.

Professional Experience

2025 – Present

E-commerce, Data Operations & Sales Specialist

Techno Store — Baghdad, Iraq

- **Automation & Workflow Optimization:** Engineered custom Python scripts and browser automation tools to streamline large-scale SKU uploading and catalog processing, cutting data processing time from days to minutes.
- **E-commerce & Data Integrity:** Managed cataloging and stock accuracy across platforms for thousands of active SKUs, maintaining complete database integrity with zero error rates.
- **Cross-Platform Integration:** Automated inventory feeds and content synchronization between internal merchant databases and major Iraqi delivery apps (Miswag, Tamata, Jahez, Al-Rayan).
- **Retail Leadership & Growth:** Supervised daily branch sales operations, managed digital media/reels marketing, and leveraged direct customer feedback to optimize digital categorization and revenue.

2023 – 2025

Freelance Data & Technical Operations Consultant

Multi-Client / Defense & E-commerce Projects — Baghdad, Iraq

- **Enterprise Database Engineering:** Built a comprehensive database system featuring over 22,000 multi-platform records for a Defense Sector project, implementing region and contact filtering for seamless retrieval.
- **Technical Troubleshooting & Platform Optimization:** Resolved critical catalog structures, API rate limits, and product feature bugs for prominent Iraq e-commerce platforms (e.g., Al-Rayan).
- **ERP System Development & Deployment:** Designed and successfully deployed a fully functional ERP & POS restaurant management system currently driving operations across 3 active restaurants.
- **Digital Media & Content Production:** Produced and executed over 60 commercial reels, technical tutorials, and brand video campaigns for retail partners (Lito Store, Techno Store).

2019 – 2023

Operations Lead & Network Support Coordinator

Events & Telecommunications Sector — Baghdad, Iraq

- **High-Pressure Event Management:** Led operational teams to plan, coordinate, and execute large-scale corporate and public events for 150+ guests, enforcing quality control and workflow efficiency.
- **FTTH Network Infrastructure:** Directed the construction and deployment of FTTH networks across 3 districts, successfully connecting 2,000+ active users using EPON systems.
- **Technical Support & Field Coordination:** Managed end-to-end troubleshooting and maintenance coordination for a subscriber base of 3,000+ active network clients.
